

YunNan trip

By Sophia

Travel to Yunnan

This summer holiday, I went to Yunnan with my family and my good friend.

Yunnan province is in the northwest of China, which called “ the colorful Yunnan”, It has many minorities there, such as Yi nationality, Bai nationality, Tibetan nationality.

The weather there like spring all the year round, even in the summer it still feels cool.

We went to Kunming, Dali and Lijiang. I like there very much!

The Stone forest

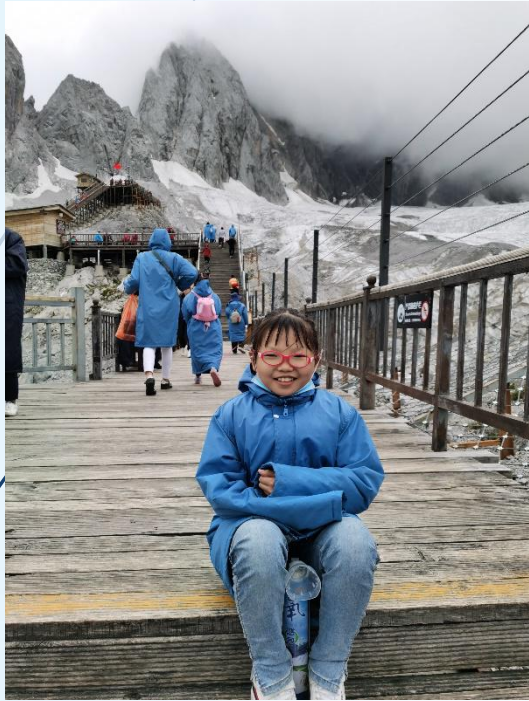

The first day we went to **Stone Forest Scenic Spot**, it is located in Kunming. Formed about 270 million years ago, the Stone Forest is the essence of karst landform unique in the world. My friend and I wore the national dress, it's very beautiful.

Dali Erhai Lake

Erhai is one of the four Dali "romantic themes" "Erhai moon". It is said that because the shape like an ear and named as "Erhai". Beside the Erhai, I rode a horse.

Yulong Snow Mountain

I climbed the Yulong snow mountain in Lijiang. Its height is 4680m. Firstly we took the big cableway to 4506m, then we carried the oxygen bottles to climb the rest. It is really difficult, we climbed several steps then need to have a rest and breathe some oxygen. I was too tired and wanted to give up. My mom encouraged me and finally I reached the summer.

The Blue Moon Valley

The blue moon valley is very beautiful. The water is clear and blue.

Through this trip, I learned that never give up we can success. Fighting!
