

Robot arms

三(8)

赵令仪 Elaine

36号

Today, I listened to a story about the alien who has robot arms.

Then I began to imagine...

What if all the people have robot arms?

We can carry a lot of things.

What if all the people have robot arms?

The arms can become long as we ^{want} ~~will~~, and we can reach far.

What if all the people have robot arms?

We will have endless energy, and we can plant a lot of trees to protect our earth.

Carry

arms long

Plant
