

NO Smoking

Senia 著
Senia 绘

Many people like to smoke,
exspecially the male. But smoking
is not good for your health,
lead. to your teeth, nose, lung
and brain be unhealthy.

TEETH

After smoking for a long
time, teeth would turn yellow,
be inflamed and get loose.

NOSE

Smoking would cause nose inflammation, which affects breathing. Nose bleeding and cough would even happen.

LUNG

Lung is very important to us, but smoking can affect its function. Lung illness and cancer would appear.

BRAIN

Brain is the most important organ. Our activity depends on it. With brain damage, less oxygen supply and stupid would follow us.

Smoking is harmful to your
body, we should refuse to smoke.

To protect the lives of our
family and us.
