Do you know how old is the fish live in your  
fish jar?

Normal carp can grow over 50 years old.

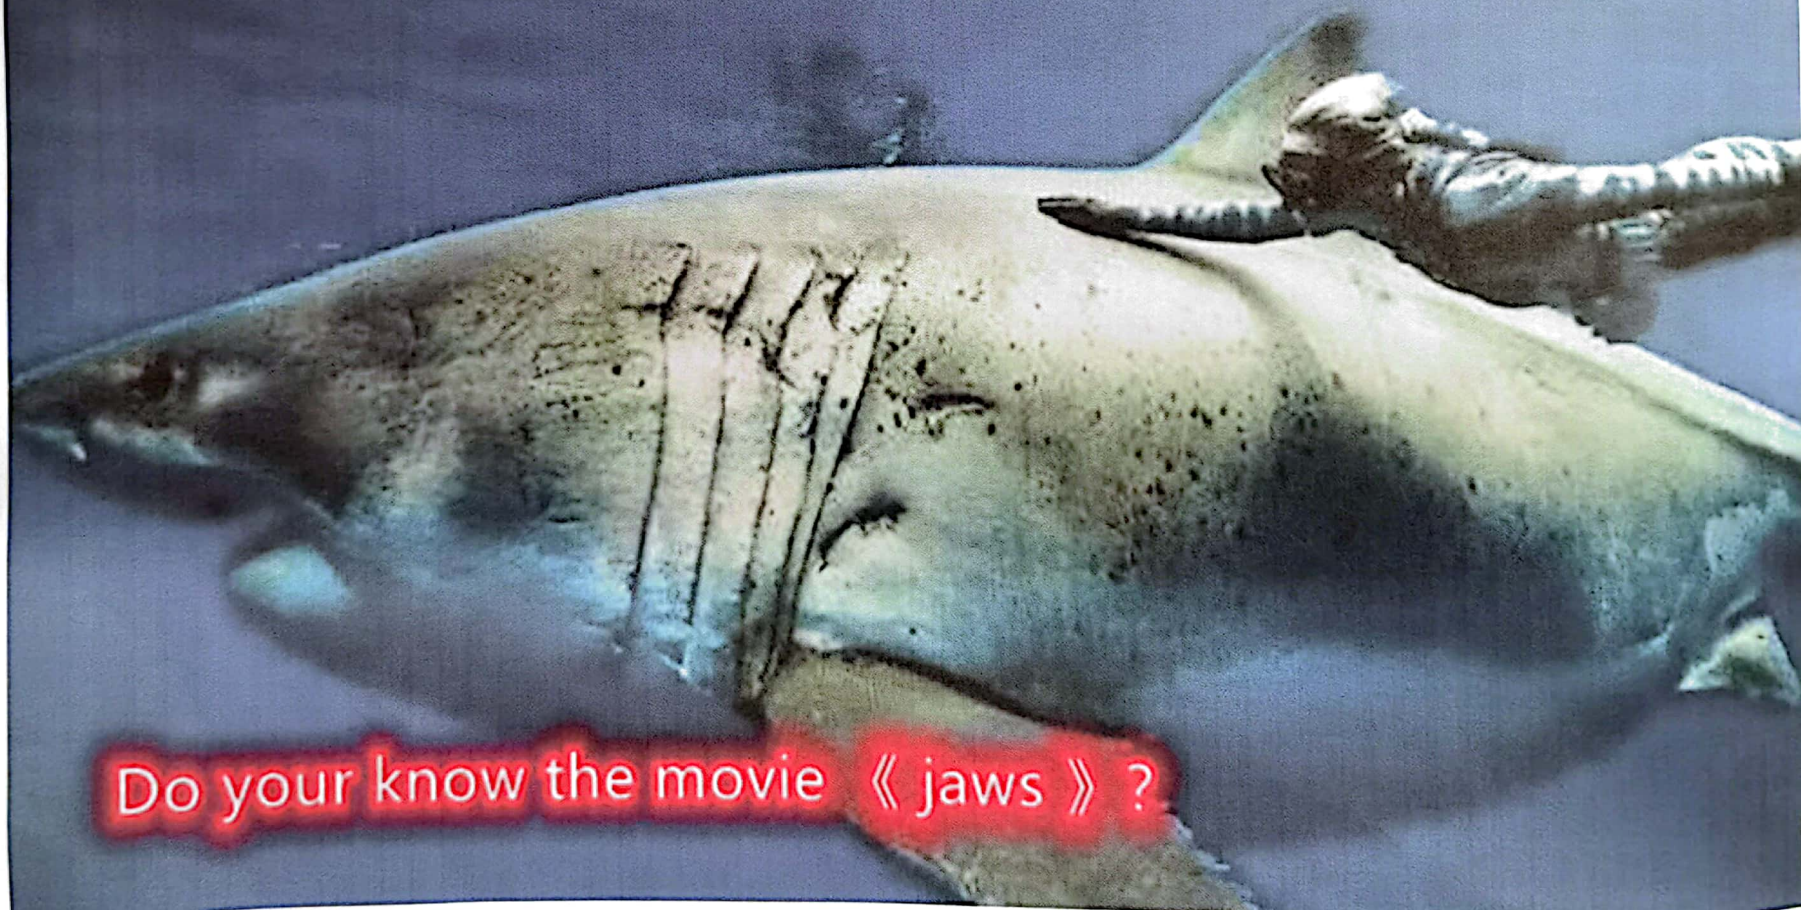

What a fat carp!

This great white shark is big! It is 60 years old, but  
it can grow to 70 years old.

Do your know the movie 《jaws》?

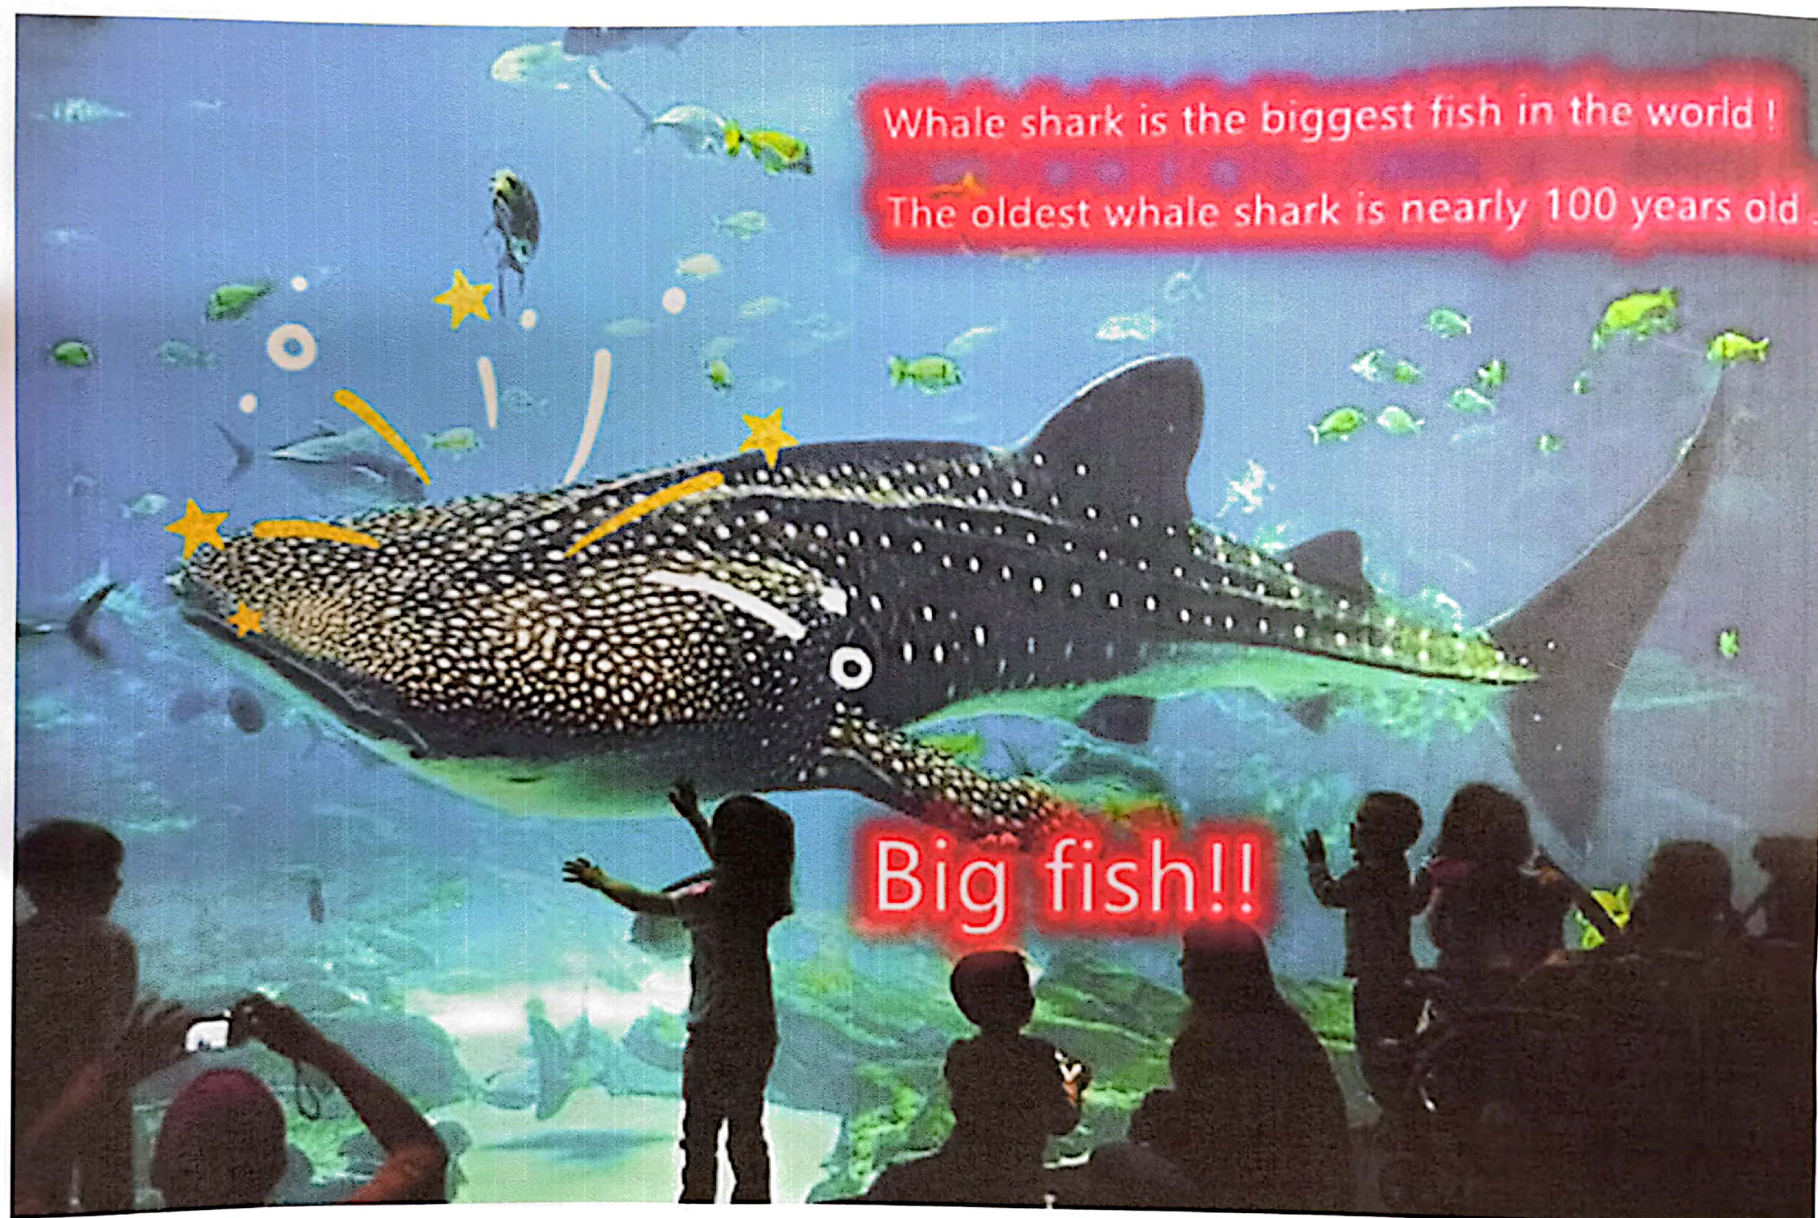

This catfish is big too, catfish can grow to 80 years old.

What a big mouth!!

Whale shark is the biggest fish in the world !

The oldest whale shark is nearly 100 years old .

Big fish!!

A large sturgeon is swimming in a pond. The fish is long and dark with a row of bony scutes along its back. In the background, there is a wooden fence and a grassy hill.

Sturgeon is the biggest freshwater fish in the world.  
It can grow to 172 years old!

Do you know how big they can grow?

This is a fancy carp, it is beautiful . the oldest fancy carp  
is 226 years old, so old!

But who is the oldest fish, fancy carp?

A large Greenland shark is shown swimming in deep blue water. The shark is angled towards the right, with its head and front fins clearly visible. The water has a slightly grainy texture, and the lighting is somewhat dim, typical of deep-sea photography.

Do you know they like eating whales?

No, fancy carp is not the oldest fish, Greenland Shark is.

Greenland Shark is one of the biggest shark in the world, they can grow over one ton, and the oldest one is 512 years old! ( Greenland Shark has blue eyes! )
