

MORE about BUGS

1. Some knowleges of Bugs

(1) Sometimes Bugs are good for us, they can make some food, and some can protect us, like hemameba

(2) But some are bad, they will make us ill, or turn good food to bad like colibacillus

⚠ When you have a wound, please try to get a plaster, because Bugs may make the wound heal more slowly.

The plague virus
It's bad for us. And it's dangerous.
It can make epidemic.

hemameba
It's good for our body. It will protect our body.

colibacillus
They are bad for our body, if there are so many colibacillus, you will be sick.
