

Murderous Maths

Writer: Kjartan Paskitt

It's maths with the laughter
added in!

Part 1: introduction

There are 10 books in this series. Each book tells us a topic in maths, such as: geometry, sum, probability. These books are my favourite because it's funny jokes and beautiful comics. (Well, probably.) When I was reading these books, I ~~can~~ learnt many maths knowledge while laughing! I couldn't even put it down. These books makes me interested in maths and English and I can learn many story stories about Maths.

Part 2: good and funny sentences and comics

① Isaac had to do tons of tricky sums to work out exactly what was happening with force. It's just a pity that he wasn't around long enough to feel the forces on a roller coaster.

② If you have a sadistic team coach who says things like this, then watch out:

Great Book Recommendation
